

FIXED WIRELESS THE RIGHT BUSINESS CONNECTION

THE IDEAL SOLUTION FOR WIRELESS LAST-MILE AND POINT-TO-POINT CONNECTIONS

Rapidly increasing business communications and IT demands require continuously improving connection capabilities and strategies. Today's fixed wireless connections can help your business achieve new levels of performance through faster, more reliable, enterprise-grade connections. Whether you're a large corporation with complex needs, a regional company with multiple locations or a small business in need of a competitive advantage, Grudi Associates can show you how fixed wireless may be the ideal solution.

FIXED WIRELESS BENEFITS

RELIABILITY & BUSINESS CONTINUITY

With fixed wireless, you can eliminate fiber and hardwire last-mile connections between your facility and the carrier. A microwave connection between antennas on your roof and the carrier tower provides an SLA of 99.995%, delivering exceptional up time even during bad weather. There are no wires or fiber in the last mile to be cut by construction, accidents, animal chewing, aging or other issues. A reliable connection is essential for business continuity and customer service.

VERSATILITY

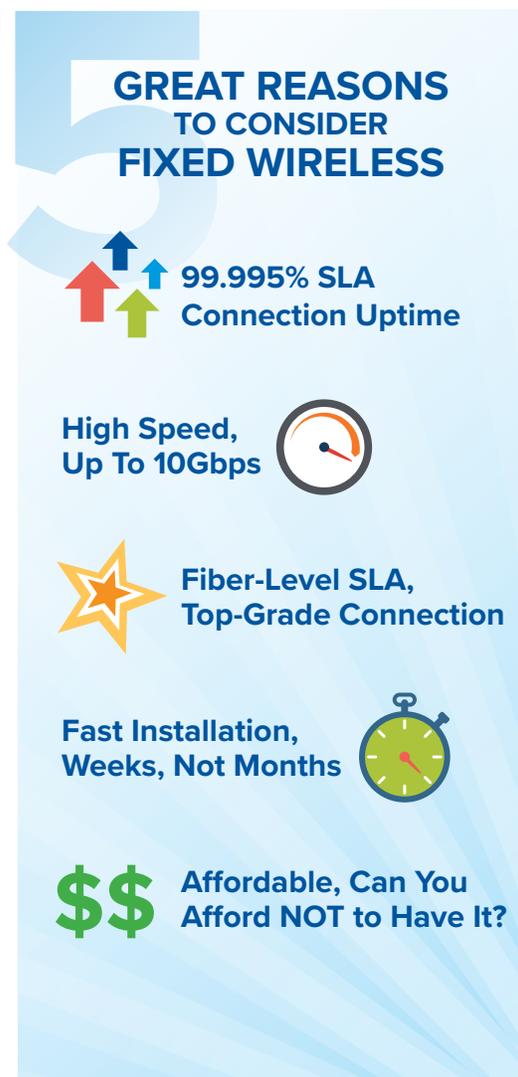

A fixed wireless connection can be used for a variety of needs.

- It can replace your primary Internet hardwire connection, saving cost and providing a variety of other benefits.
- It can function as an ultra-reliable backup connection, supplementing your fiber, copper or coax to add a second type of connection for business continuity.
- It can work in tandem with fiber, copper and coax connections to help optimize your network through SD-WAN and MPLS.
- It can also provide point-to-point connections between your facilities, creating a highly reliable, high-speed LAN, which can also connect with the carrier for Internet access.

Which options are best for your business?

SPEED & LATENCY

Fixed wireless technology can provide bandwidth up to 10Gbps with very low latency (sub 50ms) compared to other connections. Fixed wireless enterprise-quality connections are a great solution for high-volume users, compliance, sensitive applications and meeting rigorous standards.

GREAT REASONS TO CONSIDER FIXED WIRELESS

-  **99.995% SLA
Connection Uptime**
- High Speed,
Up To 10Gbps** 
-  **Fiber-Level SLA,
Top-Grade Connection**
- Fast Installation,
Weeks, Not Months** 
-  **Affordable, Can You
Afford NOT to Have It?**

RAPID DEPLOYMENT & SCALABILITY

Delays in getting a new connection can be extremely costly and damaging to a business. Fixed wireless can be installed in 30-45 days in most cases, compared to months for fiber and copper. In addition, it is easy to add or reduce bandwidth to optimize your connection and meet your business needs.

EASY INSTALLATION

Putting fixed wireless in place is quick and easy compared to other connections. Grudi Associates and our partners take care of setup, including installing the antenna on your roof, which does not require drilling into the roof for mounting. Wires just need to run from the antenna to your network.

SECURITY

Maintaining the best possible security is a top priority. Fixed wireless offers excellent security capabilities, equal or superior to other types of connections. Safeguards can be applied to meet your business and compliance needs.

COST-EFFECTIVE

Fixed wireless is typically far less costly than fiber or copper connections because there is no cable to run. Replacing your primary Internet or LAN connection with fixed wireless will likely save you a significant amount. When using it for backup or network optimization, the additional cost will provide many long-term benefits that deliver an excellent return on your investment.

GRUDI ASSOCIATES EXPERTISE

Grudi Associates has been helping businesses and organizations of all sizes and types optimize their telecom and IT and get the maximum ROI for decades. We've stayed on the cutting edge of the industry every step of the way, so that we can offer our customers the best choices, the newest technology and the most cost-effective plans. And it is all backed by unrivaled support and service. We can show you how fixed wireless can benefit your business and help you put the right solution in place.
